

11 January 2021**DCI secures Development Approval for new Sydney data centre**

DCI Data Centers has secured Development Approval from Blacktown City Council for a new 36 MW data centre to be located in Eastern Creek.

Key Points

- DCI's Sydney expansion will meet secure public and private cloud demand at the site
- Designed as Zone 3-5-ready, physical security and Tier III resilience
- Utilising new cooling technologies and higher average power densities

DCI today confirmed its latest Asia Pacific data centre development, announcing its Development Approval for a 36-megawatt (MW) facility in Sydney, Australia. The facility is scheduled for service readiness in the fourth quarter of 2022 and will be located in Eastern Creek in close proximity to Sydney's key data centres and connectivity hubs, thereby enabling direct and low latency access to Sydney.

The state-of-the-art A\$400 million facility, named SYD02, will be a new purpose-built project, specifically designed for hyperscale cloud, content and managed service providers. DCI expects the facility will also set industry-leading benchmarks for water and energy efficiency.

DCI's Chief Executive Officer Malcolm Roe said: "The team are delighted to have secured this approval which will be a crucial part of our three-stage strategy for this key site. We are also very excited to be leading the industry in delivering new cooling technologies to significantly enhance our power utilisation effectiveness and minimising our impact on the environment."

DCI's continued investment into Australia will bring significant benefits to the local economy via the creation of jobs throughout both the construction phase and ongoing operational management of the site.

About DCI

DCI is accelerating its customers' journey to the cloud. We are a service provider-neutral owner and operator of highly secure and reliable data centres from the core to the edge. Our customers range from cloud and managed service providers to government, defence and enterprises.

DCI is expanding its existing footprint from Australia and New Zealand into Asia. Our mission is to become the preferred partner for highly secure data centre solutions to our public and private cloud service customers.

DCI is a fully owned portfolio company of Brookfield Asset Management.

About Brookfield Asset Management

Brookfield Asset Management Inc. is a leading global alternative asset manager with approximately \$550 billion in assets under management across infrastructure, real estate, renewable power, private equity and credit. Brookfield owns and operates long-life assets and businesses, many of which form the backbone of the global economy. Brookfield Asset Management is listed on the New York and Toronto stock exchanges under the symbol BAM and BAM.A respectively.

Brookfield's infrastructure business owns and operates high-quality, long-life assets in the utilities, transport, energy and data infrastructure sectors across North and South America, Asia Pacific and Europe. It is listed as Brookfield Infrastructure Partners and is the flagship infrastructure company of Brookfield Asset Management. For more information, go to www.brookfield.com.
