## **DCI Data Centers announces a strategic technology partnership with Inner Range**

DCI Data Centers (DCI) and Inner Range have formed a strategic technology partnership to further enhance the security posture and access controls of DCI's data centre facilities.

### **Release Key Points**

- A key component of DCI's data centre expansion strategy is its world-leading and innovative security management system
- DCI will be partnering with Inner Range, who has built a 30-year reputation around the world for providing enterprise-grade integrated access control and intruder detection systems
- Inner Range is the first electronic security manufacturer to gain independent Class 5 Certification by the Australian Security Industry Association Limited (ASIAL)

---

DCI Data Centers offers highly secure and highly reliable data centres across Australia and the Asia Pacific region. The company's top priority is to safeguard the ICT infrastructure and assets of its service provider, government, defence and enterprise customers.

For over 30 years, Inner Range has made a significant investment into the research and development of its range of electronic security software and systems. Inner Range maintains exceptional customer relationships with more than 150,000 installations globally.

DCI Data Centers' Chief Executive Officer Malcolm Roe said, "we are delighted to be partnering with Inner Range for the supply of access control and security management systems for our data centres. DCI and Inner Range are setting a new benchmark for the continuous monitoring, access management and control to deliver an integrated multi-level security solution.

DCI will be implementing the full capabilities of the Integriti platform to deliver multi-site connectivity, system redundancy and secure customer access."

Inner Range's Senior Vice President Mark Cunnington said, "Inner Range will continue to invest and innovate to build out integrated access control and management solutions with DCI Data Centers. We will provide the resources and technical support to design solutions to meet the needs of its customers across Asia Pacific."

### **About DCI**

DCI is accelerating its customers' journey to the cloud. We are a service provider-neutral owner and operator of highly secure and reliable data centres from the core to the edge. Our customers range from cloud and managed service providers to government, defence and enterprises.

DCI is a fully owned subsidiary of Brookfield Asset Management. Its mission is to become the preferred partner in the Asia Pacific region for the delivery of highly secure data centre solutions.

### **About Inner Range**

Inner Range is a manufacturer of integrated electronic security software and systems. Australian based but world-leading, Inner Range has over 30 years' experience with more than 150,000 installations globally. Their continuous investment in research and development ensures their products maintain an innovative and cutting-edge design to the benefit of thousands of small and large organisations alike.

### **About Brookfield Asset Management**

Brookfield Asset Management Inc. is a leading global alternative asset manager with approximately \$550 billion in assets under management across infrastructure, real estate, renewable power, private equity and credit. Brookfield owns and operates long-life assets and businesses, many of which form the backbone of the global economy. Brookfield Asset Management is listed on the New York and Toronto stock exchanges under the symbol BAM and BAM.A respectively.

Brookfield's infrastructure business owns and operates high-quality, long-life assets in the utilities, transport, energy and data infrastructure sectors across North and South America, Asia Pacific and Europe. It is listed as Brookfield Infrastructure Partners and is the flagship infrastructure company of Brookfield Asset Management.
