DCI Data Centers appoints Verghese Jacob as Chief Technology Officer

DCI Data Centers (DCI) today announces the appointment of Verghese Jacob as Chief Technology Officer and member of DCI's executive leadership team.

"I am very pleased to welcome Verghese to the DCI Data Centers leadership team. Verghese has immense experience managing all aspects of data centre project development in Australia and across the APAC region." said Malcolm Roe, DCI's Chief Executive Officer.

Mr Jacob commenced his career in the Australian telecommunications industry, garnering experience in corporate safety and environment, business unit risk management, carrier facilities access, building services design and construction delivery. He advanced through the ranks of senior professional and managerial positions before establishing his own company, FMevolution in 2007, where he continued to program and project manage the delivery of world-leading designed data centres for clients such as Woolworths, Pacnet (now Telstra), DXC.technology, Metronode (now Equinix) and AirTrunk.

Mr Jacob said: "I am looking forward to the challenge of developing the next generation of reliable, secure, and sustainable data centres across Asia Pacific, while working with people I respect, in a company that strives for the highest standards of business ethics."

"With a proven track record in safety, technology and program management for the delivery of global scale telecommunications and data centre infrastructure, my next move involves a greater focus on technology innovation and leadership in sustainability." he added.

About DCI

DCI Data Centers is a service-provider-neutral provider of data centre services. We serve cloud service providers, telecommunication companies and large government and enterprise users from our own highly secure and reliable data centre facilities.

DCI Data Centers' mission is to become the preferred partner in the APAC region for the delivery of highly secure data centre solutions.

"DCI has some very exciting new data centre projects in final development, which we'll be announcing in due course," said Mr Roe.

About Brookfield

DCI was acquired by Brookfield Infrastructure and its institutional partners. DCI is a portfolio company of Brookfield Infrastructure, a leading global infrastructure asset manager that owns and operates high-quality, long-life assets in the utilities, transport, energy and data infrastructure sectors across North and South America, Asia Pacific and Europe.
